

SCIENCE @ OPA

All children can learn in science by following their natural curiosity. At OPA we provide excellent opportunities for science learning so that our children understand the world they live in and can become the scientists of the future.

- We ask **questions** and seek **answers** to gain knowledge and understanding about the wonders of the world.
- We often learn **practically** and plan and carry out our own **investigations**, reflecting upon the outcomes.
- We use **scientific vocabulary** accurately and build upon our learning.

OUR VISION

- We understand how science is used in the **real world** and have opportunities to meet scientists.
- We work **collaboratively** and learn from each other.
- We make **links** between science and other areas of our learning, particularly **STEM** subjects.
- We use the results of our investigations to make **conclusions** and consider **why** this happened.
